

M.A. Himasha Chinthani

📍 Colombo, Sri Lanka — 📞 +94 74 0469099 — ✉ himashachinthani@gmail.com
in [linkedin.com/in/himashachinthani](https://www.linkedin.com/in/himashachinthani) — 🌐 github.com/himashachinthani — 🌐 [my-portfolio](#)

Profile

Recent graduate from the University of Colombo School of Computing, with hands-on industry internship experience. Skilled in designing scalable full-stack applications and building robust REST APIs using Java, Go, React, Spring Boot, and Node.js. Proficient across MySQL, PostgreSQL, and MongoDB, with a strong commitment to applying clean software design patterns, maximizing system reliability, and delivering high-performance, user-centric solutions.

Technical Skills

Languages: Java, Go, C, C++, Python, JavaScript, VB.NET

Developer Tools: Git, GitHub Workflows, Postman, Bruno, Jenkins, VS Code, IntelliJ IDEA, Visual Basic

Frameworks/Technologies: React.js, Node.js, Express.js, Spring Boot, Flutter, Tailwind CSS, Java (Servlets), JSP

Cloud & Databases: MySQL, MongoDB, PostgreSQL, AWS, Nginx, Docker, GitHub Actions, CI/CD Pipelines

Software Principles: Object-Oriented Design Patterns, Agile/Scrum, RESTful APIs

Soft Skills: Teamwork, Problem-solving, Adaptability, Good communication, Passion for Technology

Work Experience

Software Engineer Intern

CodeAisys (4A Technology Pvt Ltd)

Dec 2025 – June

2026

Restaurant Management System (RMS)

- Spearheaded the technical migration of a legacy PHP/Laravel application into a high-performance, decoupled back-end utilizing **Go (Golang)** and **PostgreSQL**.
- Engineered a robust server-side architecture using **Hexagonal Architecture** (Ports and Adapters) to isolate core business rules from external dependencies.
- Designed optimized ERDs and implemented backend logic for flexible menu sizing, pricing controls, and concurrent order synchronization.
- Enforced system security by designing and deploying **Role-Based Access Control (RBAC)** tiers to safeguard sensitive financial and operational data.
- Formulated comprehensive API test suites and contracts using **Bruno** to streamline cross-team frontend integration.
- **Technologies:** Go, GORM, PostgreSQL, React, Bruno, GitHub

Stock Management System

- Developed a desktop-based enterprise ERP application using **VB.NET** and **MySQL** to centralize tracking of high-volume inventory movements.
- Engineered a comprehensive stakeholder database module, implementing full CRUD functionality for automated customer and supplier profiling.
- Built core financial logic to monitor customer credit boundaries, track outstanding cheque clearance status, and manage supplier debit ledgers.
- Integrated **Crystal Reports** through secure **ODBC** database tunnels to transform raw transactional data into actionable business intelligence insights.
- Refactored critical user interface components and backend validation flows based on specific client feedback to maximize usability.
- **Technologies:** VB.NET, .NET Framework, MySQL, Crystal Reports, ODBC, SQL.

Education

University of Colombo School of Computing

B.Sc. in Computer Science (Graduating 2026), Second Class Upper Division

2023 – 2026

St. Mary's Convent, Matara

G.C.E. A/Ls: Physics - B, Chemistry - A, Combined Mathematics - A

2021

Projects

Agrovia – Digital Agriculture Platform (*Group Project*)

June 2025 – Oct
2025

- Developed a comprehensive digital agriculture platform engineered to empower Sri Lankan farmers with sustainable farming tools.
- Provided direct market access, bulk purchasing capabilities, and an integrated transport coordination module.
- Implemented a central knowledge hub along with smart features including real-time price forecasting, localized pest alerts, and pre-harvest contracts.
- Applied Agile software development methodologies, utilizing Jira for sprint tracking and project management.
- **Technologies:** React.js, Node.js, MySQL, Jira, Agile
- **GitHub:** [Frontend](#) — [Backend](#)

Food Ordering Platform – Microservices Web App (*Individual Project*)

Nov 2025 – Mar
2026

- Designed and developed a fully responsive food ordering application built on a scalable microservices architecture.
- Decoupled backend operations into modular services including authentication, user management, menu/catalog, and order processing.
- Engineered a reliable checkout system featuring persistent shopping carts, payment processing, and dedicated admin dashboards.
- Managed a polyglot persistence tier utilizing multiple databases including PostgreSQL, MySQL, and MongoDB via RESTful APIs.
- **Technologies:** React.js, Spring Boot, PostgreSQL, MySQL, MongoDB, JWT, RESTful APIs
- **GitHub:** [Frontend](#) — [Backend](#)

Parliament – Civic Engagement Platform (*Group Project*)

May 2024 – Apr
2025

- Developed a civic web platform designed to facilitate secure and improved communication between politicians and citizens.
- Implemented strict role-based access controls for differentiated application experiences across Citizens, Politicians, and Administrators.
- Programmed a multi-tier feature set comprising public surveys, discussion rooms, fundraising mechanisms, announcements, candidate comparison tools, and meeting schedulers.
- Structured the codebase on a native MVC architecture entirely from scratch without relying on external frameworks.
- Adhered strictly to core Object-Oriented Programming (OOP) principles and software design patterns to maximize maintainability.
- **Technologies:** Java, JSP, PostgreSQL, MVC, OOP
- **GitHub:** [Repository](#)

Leadership & Volunteering

Team Member (Member Development) – IEEE Student Branch, UCSC (September 2023 – May 2024)

Team Member (Finance) – Hackoholic, Women in Engineering (UCSC)

Achievements

- Semi-Finalist — PearlHack 3.0 Ideathon
- Participant — IdeaForge Inter-University Ideathon, MoraXtreme 9.0 Algorithmic Coding Competition
- Chess Player – Interfaculty Freshers’ Meet 2023 (1st Runner-up), Interfaculty Meet 2024 (2nd Runner-up).

Certificates

- Programming Foundations: Object-Oriented Design – Olivia Chiu Stone and Barron Stone
- AWS Educate: Introduction to Cloud 101 – Amazon Web Services (AWS)
- React Essential Training – Eve Porcello
- Python Quick Start – Madecraft and Lavanya Vijayan
